WRITTEN OPINION

International application No.

PCT/US00/09927

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

l statement			
Novelty (N)	Claims Claims	(Please See supplemental sheet) (Please See supplemental sheet)	YES NO
Inventive Step (1S)	Claims Claims	(Please See supplemental sheet) (Please See supplemental sheet)	YES NO
Industrial Applicability (IA)	Claims Claims	(Please See supplemental sheet) (Please See supplemental sheet)	YES NO

2. citations and explanations

Claims 1-3, 5-10, 12, 16-24, 26 and 27 lack novelty under PCT Article 33(2) as being anticipated by GIRET ET AL., column 9, line 47 - column 11, line 10, noting especially Example VII containing, inter alia, 3% coconut monoethanolamide. While GIRET ET AL. do not use applicant's nomenclature of "emulsifying surfactant", they do disclose cocoamphoacetate, Na laureth - 3 sulfate, etc. (column 10, lines 1-27; and Example VII), and it is well-settled that a reference need not disclose a specific limitation in haec verba.

Claims 4, 11, 13-15, 25 and 28-31 lack an inventive step under PCT Article 33(3) as being obvious over GIRET ET AL. above. The especially pertinent portions of GIRET ET AL. are pointed out in the preceding paragraph. As to claims 4, 28 and 29, herein, while Example VII of GIRET ET AL. does not disclose a concentration of coconut monoethanolamide of 5% or above, it would not involve an inventive step to use such concentrations in the compositions of GIRET ET AL. because they suggest this in column 5, lines 53-59. As to claims 11 and 13-15 herein, while the cleansing composition of Example VII of GIRET ET AL. does not contain a betaine, it would not involve an inventive step to incorporate a betaine, such as cocoor lauryl - amidopropyldimethylcarboxymethyl betaine, in said cleansing compositions of Example VII of GIRET ET AL. because they suggest doing this in column 2, lines 41-44; column 5, lines 53-56; and column 7, lines 8-23. As to claim 25 herein, while GIRET ET AL. may post - add their perfume after mixing phases A and B (in which phase B contains coconut monoethanolamide), it would not involve an inventive step to solubilize the perfume of GIRET ET AL. in said phase B instead of post - adding it, absent any unexpected result. The order of procedure in mixing ingredients of a composition is a mere matter of choice within the skill of the art. As to claims 30 and 31 herein, while GIRET ET AL. may not exemplify a terminal step of adjusting solids content to not more than 60% by adding water, it would not involve an inventive step to use such a terminal step in the process of GIRET ET AL. because their disclosure in column 9, lines 40-42, suggests such a procedure. (Continued on Supplemental Sheet.)

International application No.

PCT/US00/09927

V.	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
	citations and explanations supporting such statement

1. statement			
Novelty (N)	Claims Claims	4, 11, 13-15, 25 and 28-31 1-3, 5-10, 12 and 16-21	YES NO
Inventive Step (IS)	Claims Claims	22-27 1-21 and 28-31	YES NO
Industrial Applicability (IA)	Claims Claims	1-31 none	YES NO

2. citations and explanations (Rule 70.7)

Claims 1-3, 5-10, 12, 16-21 and 26 lack novelty under PCT Article 33(2) as being anticipated by GIRET ET AL., column 9, line 47 - column 11, line 10, noting especially Example VII containing, inter alia, 3% coconut monoethanolamide. While GIRET ET AL. do not use applicant's nomenclature of "emulsifying surfactant", they do disclose cocoamphoacetate, Na laureth - 3 sulfate, etc. (column 10, lines 1-27; and Example VII), and it is well-settled that a reference need not disclose a specific limitation in haec verba.

Claims 4, 11, 13-15 and 28-31 lack an inventive step under PCT Article 33(3) as being obvious over GIRET ET AL. above. The especially pertinent portions of GIRET ET AL. are pointed out in the preceding paragraph. As to claims 4, 28 and 29, herein, while Example VII of GIRET ET AL. does not disclose a concentration of coconut monoethanolamide of 5% or above, it would not involve an inventive step to use such concentrations in the compositions of GIRET ET AL. because they suggest this in column 5, lines 53-59. As to claims 11 and 13-15 herein, while the cleansing composition of Example VII of GIRET ET AL. does not contain a betaine, it would not involve an inventive step to incorporate a betaine, such as coco or lauryl - amidopropyldimethylcarboxymethyl betaine, in said cleansing compositions of Example VII of GIRET ET AL. because they suggest doing this in column 2, lines 41-44; column 5, lines 53-56; and column 7, lines 8-23. As to claims 30 and 31 herein, while GIRET ET AL. may not exemplify a terminal step of adjusting solids content to not more than 60% by adding water, it would not involve an inventive step to use such a terminal step in the process of GIRET ET AL. because their disclosure in column 9, lines 40-42, suggests such a procedure.

Responsive to applicant's remarks of 09 February 2001: The concentration of cocoamphoacetate plus cocoamphodiacetate in Example VII of GIRET ET AL. is 5% (within applicant's range of 5-30%). Applicant's claims in "comprising" do not exclude the presence of an additional surfactant and/or additional liquid ingredients. Note that GIRET ET AL. in column 5, lines 53-59, (Continued on Supplemental Sheet.)

International application No PCT/US00/09927

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claim 31 is objected to under PCT Rule 66.2(a)(v) as lacking clarity under PCT Article 6 because claim 31 is indefinite for the following reason(s):

Claim 31 is indefinite in being a dependent claim which depends upon itself. (Apparently claim 31 should depend upon claim 30).

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/US00/09927

I.	Basis of the report	
1	/ith regard to the elements of the international application: *	
	the international application as originally filed	
	the description:	
	pages (See Attached) a	s originally filed
	pages, filed	with the demand
	pages, filed with the letter of	
	the claims.	
	pages (See Attached)	as originally filed
	pages, as amended (together with any statement)	
	pages, filed pages, filed with the letter of	with the demand
	pages, filed with the letter of	
	the drawings:	
	pages (See Attached) , a	s originally filed
	pages, filed	with the demand
	pages, filed with the letter of	
	the sequence listing part of the description:	
	pages (See Attached) , a	
	pages, filed	with the demand
	pages, filed with the letter of	
2.	with regard to the language, all the elements marked above were available or furnished to this Authority in the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language the language of a translation furnished for the purposes of international search (under Rul the language of publication of the international application (under Rule 48.3(b)). The language of the translation furnished for the purposes of international preliminary examination (or 55.3).	which is: e 23.1(b)).
3.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application or community of the sequence disting:	on, the international
	contained in the international application in printed form.	
	filed together with the international application in computer readable form.	
	furnished subsequently to this Authority in written form.	
	furnished subsequently to this Authority in computer readable form.	
	The statement that the subsequently furnished written sequence listing does not go beyond the	disclosure in the
	international application as filed has been furnished.	discussion in the
	The statement that the information recorded in computer readable form is identical to the writen se been furnished.	quence listing has
4.	The amendments have resulted in the cancellation of:	
	X the description, pages none	
	x the claims, Nos. none	
	X the drawings, sheets/fig none	
5	This report has been drawn as if (some of) the amendments had not been made, since they have been	n considered to go
	beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**	
4	eplacement sheets which have been furnished to the receiving Office in response to an invitation under Article I this report as "originally filed" and are not annexed to this report since they do not contain amendant 70.17).	14 are referred to nents (Rules 70.16
*	ny replacement sheet containing such amendments must be referred to under item 1 and annexed to to	his report.

IMPORTANT NOTIFICATION

Applicant's or agent's file reference

MCI-004.1-PC

International filing date (day/month/year)

Priority Date (day/month/year)

International application No. PCT/US00/09927

14 APRIL 2000

14 APRIL 1999

Applicant

MCINTYRE GROUP, LTD.

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the 1. international preliminary examination report and its annexes, if any, established on the international application.
- A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication 2. to all the elected Offices.
- Where required by any of the elected Offices, the International Bureau will prepare an English translation of 3 the report (but not of any annexes) and will transmit such translation to those Offices.

REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

WRITTEN OPINION

International application No.

PCT US00 09927

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of Boxes I - VIII

Sheet 10

TIME LIMIT:

The time limit set for response to a Written Opinion may not be extended. 37 CFR 1.484(d). Any response received after the expiration of the time limit set in the Written Opinion will not be considered in preparing the International Preliminary Examination Report.

CLASSIFICATION:

The International Patent Classification (IPC) and/or the National classification are as listed below:

IPC(7): A61K 7/075; B01F 3/08; C11D 1/90, 1/94 and US C1.: 510/123, 416, 417, 502; 516/67, 69

V. 1. REASONED STATEMENTS:

The opinion as to Novelty was positive (YES) with respect to claims 4, 11, 13-15, 25 and 28-31.

The opinion as to Novelty was negative (NO) with respect to claims 1-3, 5-10, 12, 16-24, 26 and 27.

The opinion as to Inventive Step was positive (YES) with respect to claims none.

The opinion as to Inventive Step was negative (NO) with respect to claims 1-31.

The opinion as to Industrial Applicability was positive (YES) with respect to claims 1-31.

The opinion as to Industrial Applicability was negative (NO) with respect to claims none.

V. 2. REASONED STATEMENTS - CITATIONS AND EXPLANATIONS (Continued):

	Claims	1-31 I	have	industrial a	applicability	under	PCT	Article	33(4)	because	the	subject	matter	claimed	can	be	made
and used	in the	deterge	ent ar	nd cosmetic	e industries.

IPC(7): A61K 7/075; B01F 3/08; C11D 1/90, 1/94 and US Cl.: 510/123, 416, 417, 502; 516/67, 69

I. BASIS OF REPORT:

This report has been drawn on the basis of the description, page(s) 1-7, 9, 10 AND 11-24, as originally filed.

page(s) NONE, filed with the demand.

and additional amendments:

Page(s) 8 and 11, filed with the letter of 09 February 2001.

This report has been drawn on the basis of the claims,

page(s) 25-30, as originally filed.

page(s) NONE, as amended under Article 19.

page(s) NONE, filed with the demand.

and additional amendments:

NONE

This report has been drawn on the basis of the drawings,

page(s) none, as originally filed.

page(s) NONE, filed with the demand.

and additional amendments:

NONE

This report has been drawn on the basis of the sequence listing part of the description:

page(s) NONE, as originally filed.

pages(s) NONE, filed with the demand.

and additional amendments:

NONE

V. 2. REASONED STATEMENTS - CITATIONS AND EXPLANATIONS (Continued):

teach that fatty monoethanolamides are preferred.

Claims 22-27 meet the criteria of PCT Article 33(2-3) because the cold mixing process recited is not disclosed or fairly suggested by the prior art.

Claims 1-31 have industrial applicability under PCT Article 33(4) because the subject matter claimed can be made and used in the detergent and cosmetic industries.

	NEW	CITATIONS	
none			

PENUS09 FEB 2001

ambient temperature in the range of about zero°C to about 30°C, over a period of at least one week. The term "high solids" as used herein means that the sum of all non-volatile components in the emulsion is in the range of at least about 20 weight percent to not more than about 60 weight percent, preferably in the range of about 25 weight percent to not more than about 55 weight percent, of the total emulsion weight.

Monoalkanolamides useful herein can be made by

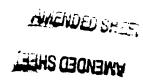

10 any process known in the art so long as they form a monoalkanolamide surfactant emulsion. Commercially available monoalkanolamides suitable for preparing monoalkanolamide surfactant emulsions of this invention are available from a number of suppliers and can be prepared by

15 any of various known synthetic processes, such as, but not limited to, the catalytic trans-esterification of fatty acids or derivatives thereof (commonly referred to as superamides) or by direct amidation of fatty acids with C₂-C₆ alkanolamine. Non-limiting examples of commercially

20 available monoalkanolamides and suppliers are found in the INCI Dictionary, incorporated herein by reference.

Preferred monoalkanolamides are alkanolamine condensates of fatty acids such as, but not limited to, lauric acid, palmitic acid, stearic acid, oleic acid, linoleic acid and fatty acids derived from plant oils such as, but not limited to coconut oil, soybean oil, canola oil (genetically modified Canadian rapeseed oil), wheat germ oil, peanut oil, corn oil, olive oil, and the like and mixtures thereof. As long as a monoalkanolamide surfactant emulsion can be formed, the type of plant oil employed for making monoalkanolamide derivatives is limited only by economics or commercial production of such oils.

Preferred monoalkanolamides are monoethanolamides, such as, but not limited to, coconut

● PCT/US 00/09927 ■PEA/US09 FEB 2001

not limited so long as interaction, if any, between surfactants does not result in solid precipitate formation and interfere with the formation of the monoalkanolamide surfactant emulsion.

The term "amphoteric surfactants" refers to that 5 class of surfactants that can exist in three different charged forms depending on pH; i.e., cationic, zwitterionic or anionic, and includes the water-soluble salts thereof. Suitable amphoteric surfactants include, but are not 10 limited to, acylamphoacetate, acylamphodiacetates, acylamphopropionates, wherein the acyl group has from about 8 to about 22 carbon atoms. Preferred amphoteric surfactants include, but are not limited to, sodium cocoamphoacetate, sodium lauroamphoacetate, disodium caprylamphoacetate, disodium cocoamphodiacetate, disodium 15 lauroamphodiacetate, disodium wheat germamphodiacetate, sodium cocoamphopropionate, disodium capryloamphodipropionate, disodium cocoamphodipropionate, disodium lauroamphodipropionate and the like. Sodium 20 cocoamphopropionate is particularly preferred.

The term "zwitterionic surfactant" refers to that class of surfactants that can exist as intronium or inner salts (i.e., in zwitterionic form) at a pH at and above their isoelectric points (neutral and alkaline pH) and are either zwitterionic or cationic below their isoelectric points (acid pH). Suitable zwitterionic surfactants include, but are not limited to, betaine surfactants, such as alkyl betaine, alkylamido betaine and the like and sulfobetaines (sultaines), such as alkyl sultaine,

30 alkylamido sultaine and the like, wherein the alkyl group has from about 8 to about 22 carbon atoms. Particularly preferred are betaines including, but not limited to, cocobetaine (cocodimethylglycine), octyl betaine, lauryl betaine, cetyl betaine, oleyl betaine, cocoamidopropyl
